

# YOUR Path to Offering LifeSecure Products at the worksite

## Getting Started

Once you make the decision to include a LifeSecure insurance product in your company's benefit package, your agent will submit a request to LifeSecure to set-up your group.

## Approve/Endorse the Offering

Next, a member of LifeSecure's Worksite Sales Team will contact you to review the benefit offering together and obtain your approval and endorsement via email.

## Communicate with Employees

LifeSecure will then work with your Benefits Manager to customize a communications plan for your company. Choose from a variety of marketing messages and formats to educate employees about the new benefit(s) and provide instructions on how to apply for coverage.

## Policy Administration

Your company will have access to a secure LifeSecure portal where you can view your list bill and other important information regarding your LifeSecure insurance business.

## Customer Support

Assistance is always a click or call away!

Our customer support teams are available to help you and your employees when questions arise.

Employees can also view their policies, update personal information, file claims or make changes via their Policyholder portal.
